

# Royal College of Physicians

## **Mr Andrew Thompson Biography**

Andrew Thompson is Co-Founder, President and Chief Executive Officer of Proteus Digital Health. His vision for digital medicine is focused on expanding global access to care, dramatically increasing the value delivered by drugs and creating a more sustainable model for innovation that leverages the mobile device in everyone's pocket.

He is also a Co-Founder and Board Member of Summit Schools, a leading Charter School organization with an acclaimed track record and unique digital platform, featured in the Davis Guggenheim movie "Waiting for Superman".

Thompson is active in digital humanities innovation as a Member of the Stanford University Libraries and Academic Information Resources Council and with Cambridge University. He is a Co-Founder of Parker Library Online - a leading destination for digital medieval studies.

He holds master's degrees in Engineering (Cambridge), Education (Stanford) and Business (Stanford GSB) and has a successful 25 year track record starting and building technology-based healthcare companies in Silicon Valley.

## **Presentation Summary**

**Topic:** Digital Medicines Can Help Physicians Go on Vacation

Medicines that communicate with a patient's mobile when swallowed are commercial products in the USA. In this presentation you will learn how they expand access, improve outcomes and reduce costs. Digital Medicines enable physicians to more effectively manage chronic conditions in community settings and ensure they use their time for their patients who most need help and for their families who most need love.
